Title: Perfecting Your Penalty Stroke

Preparation Cue:

Take a deep breath in, hold it for three seconds, and exhale slowly. Feel your feet firmly planted on the grass, and center your focus on the present moment.

Main Imagery Script:

1. You are walking calmly to the penalty stroke spot at the Peradeniya University ground. The grass beneath your blue shoes feels familiar and comforting.
2. You set your stance with your legs shoulder-width apart. The ground is firm, and you feel stable and ready.
3. Looking down at the white ball, you notice how it contrasts sharply against the green grass. Your red Alfa stick is in position, feeling just right in your hands.
4. Scanning the entire goal, you observe the space without focusing on any particular corner. The goalkeeper is there, but you feel prepared and capable.
5. Your gaze returns to the ball, honing your focus. The goal fades slightly as you concentrate solely on your next actions.
6. You settle your grip – left hand at the top of the grip, right hand in the middle. Your body feels ready, muscles controlled yet relaxed.
7. Initiating the stroke, your movement is smooth and controlled. There's a rhythm to your swing that feels natural.
8. You strike the ball decisively, the contact sound crisp and satisfying. Your intention is hidden, your direction precise.
9. Following through naturally toward the target, your stick moves in a perfect arc. The sensation of the follow-through feels fluid and right.
10. Regaining balance, you stand in a composed and confident position. Your body feels light and agile, ready for the next play.

Closing Performance Affirmation:

"I am focused, ready, and execute my penalty strokes with precision and confidence."
